

# Investing for the future...

## QUALITY NOT QUANTITY!

Kalgoorlie Metro Property Group has taken their boutique agency from strength to strength with focus on developing a high performing Property Management Team, which is dedicated to the commitment of looking after Owners/Investors and their assets.

I think what makes us stand out when owners are looking for a reputable company to manage their property, is that we will not allow our Property Managers individual portfolio's, to expand beyond a level that takes away that personal service investors deserve when having their property portfolio managed.

We know that investors need a piece of mind that their portfolio is being managed professionally and ethically. This was our number one area which we addressed with Jenna Dewar, our Senior Property Manager, when

developing the department. Quality not quantity! Let's not overload our managers, instead let's display a work ethic that will attract owners and investors to Kalgoorlie Metro.

We have proven that Quality attracts Quantity, with the property management department growing at a rapid rate. We have our manager/property ratio and we will continue to support this successful structure, it is what we develop our whole business on quality service = quality results.

*"My wife and I discussed investing in property and in particular based around the ever growing resource industry, we were referred by a friend to get in touch with Kalgoorlie Metro Property Group. Turns out it was the best advice we have ever had, 3 months later we were property Investors getting high return on our money, and what makes it more attractive is the ongoing support from this switched on property team"*

– Chris Rourke, Scarborough
